BATHWORKS®

where water meets modern®

Blu Bathworks® is a Canadian modern bathware design house and manufacturer based in the heart of beautiful British Columbia. Founded in 2006 by designer Michael Gottschalk, Blu Bathworks' core design philosophy is to create contemporary architectural bathware that balances minimalistic forms with sustainable functionality. Blu Bathworks continues to grow from collaborations with established designers and premium factories in Europe to achieve a high level in both aesthetics and design structure.

Being the complete modern bathware solution, Blu Bathworks offers a wonderful range of rich and unique products that are fully certified in the North American market. Collections include bathtubs, shower bases, basins, countertops, tapware, shower systems, toilets + bidets, and furniture + accessories – all designed to work in harmony or as standalone pieces.

advocating modern lifestyle with minimalist designs

With an inherent passion for water conservation, **Blu Bathworks®** is committed to developing sustainable products for an ecological future.

Sustainability is embedded in our corporate identity, expressed in our attitude to our product offering as well as our production processes. We continually strive to optimize and innovate our production processes from an ecology viewpoint.

This passion, motivated us to create our signature eco-friendly blu-stone™ material. Crafted from 80% quartzite, blu-stone™ is exceptionally durable, and offers a natural stone-like texture and appearance.

Available in a selection of bathtubs, shower bases, basins, and countertops, blu-stone™ requires less energy to produce than its ceramic counterpart-fired in a kiln at lower temperatures for a significantly shorter timeframe. Furthermore, as a recyclable and repairable material, there is limited production

wastage – which is good news for the landfill. As with all Blu products, care has been taken to ensure the application goes beyond design, the composition of blu-stone™ provides superior water temperature retention, thus requiring less water consumption for an optimum bathing experience.

Where water meets modern™; combining new technology, innovative processes, and contemporary design, Blu Bathworks strives to create bathware products which enhance longevity and value in people's daily lives. We are proud to feature quality sustainable products that are impactful by design and can provide an enriching bathing experience.

The ability to create dramatic designs, with less impact on the environment than traditional bathware products is a great source of pride for our brand.

features & benefits

Exclusively crafted by Blu Bathworks, **blu-stone™** is the brand's signature eco-friendly stone collection, available in a range of luxury bathtubs, shower bases, basins, and countertop designs.

Luminous and highly tactile, this award-winning designer's favorite offers durable and versatile fixtures for the modern and transitional bathroom environment. Available in freestanding and alcove applications with a wide range of size and style for maximum design flexibility and optimum bathing experience.

Durable

Crafted from 80% quartzite, blu-stone™ is an exceptionally durable material, which looks and feels like natural stone. It is high-pressure injection molded, anti-microbial and non-porous. Low maintenance and repairable, blu-stone™ bathware is stain and scratch resistant.

One-Piece Design

Each blu-stone™ fixture is crafted as a seamless, one-piece design, exhibiting an architectural quality in addition to practical benefits such as prevention of mildew and mold.

Colors + Texture

A selection of blu-stone™ bathtubs are available in a range of vibrant, modern colors including lime, concrete (grey), black and more. Homogenous in nature, the color is consistent throughout, resulting in a more vibrant and lasting color. Bathtubs are available in matte, gloss, or embossed finishes.

Sustainable

blu-stone™ is sustainable given its low energy production process, requiring less time in the kiln at lower temperatures than ceramics. As a recyclable material, blu-stone™ limits production wastage. The material composition also provides superior water temperature retention, thus reducing water consumption.

Designer Series

blu-stone™ collection provides the flexibility to coordinate materials across the bathroom, with bathtub options to suit every design requirement. Choose from freestanding to alcove bathtubs, condo-proportioned to deep-soaker tubs. blu-stone™ is the ideal material for creating custom design solutions to support project specifications.

blu·stone™ finishes

Matte: Visually luminous and highly tactile, matte finish is soft, almost warm – to the touch and invokes a minimalist, architectural quality.

Gloss: High gloss finish is available for select blu-stone™ pieces, which adds a modern touch and enhances design coordination.

Embossed: A selection of blu-stone™ pieces are available with an exterior embossed design, which creates texture and personalization.

features & benefits

Blu Bathworks® **blu-stone™ shower base** is Italian-crafted using the brand's signature, eco-friendly blu-stone™ material. The low threshold shower base provides design flexibility, exceptional durability, architectural style, and a range of lengths in 31½" or 35½" width options. Further customization is possible as the shower base can be cut to fit on-site.

New range of colors and textures available in 2018.

blu-stone™

Shower bases are molded from signature blu-stone™ material that looks and feels like natural stone. This 80% quartzite, high pressure injection mold is exceptionally durable, repairable, and is both stain and scratch resistant. This sustainable shower base does not require regular maintenance like tile and alternative materials, such as resealing the grout.

Design Flexibility

The versatile right/left drain installation makes the shower base a convenient prospect for both new construction and remodels. Easily customizable, the shower receptor can be cut-to-fit specific lengths on-site or cut to work around awkward corners or obstructions. For a unified design aesthetic, the shower base coordinates with a range of blu-stone™ bathtubs, sinks and vanity countertops.

One-Piece Design

Architecturally beautiful, the practical benefits of a seamless one-piece blu-stone™ shower base include the prevention of growth of mildew and mold, that typically occurs with grout. One-piece design also reduces the likelihood of leakage from the cracks in tiles and other alternatives. The shower base is molded to include a sloped floor that ensures water run-off through the drain only.

Easy Installation

Precision engineered with an ultra-low 1¼" threshold makes the blu-stone™ shower base much easier to install. Whether it is surface-mounted or recessed, the shower base requires less labor and its associated cost to install.

features & benefits

The **blu-stone™ basin** collection continues to grow, building on the success of star pieces such as the coco freestanding pedestal basin. This carefully curated collection includes a range of models for countertop, freestanding, and vanity top applications – all embodying the brand’s minimalist aesthetic and seamless design.

blu-stone™

Basins are created from signature blu-stone™ material that is high pressure injection molded from 80% quartzite. This dynamic material is durable and eco-friendly. Crafted in Italy, blu-stone™ requires less energy to produce and is recyclable and repairable in nature.

Durable

blu-stone™ basins are non-porous, stain and impact resistant making them hygienic and durable for daily uses. Easy to remove make-up stains, and can be readily repairable, the blu-stone™ basins are perfect for any household.

One-Piece Design

Beautiful one-piece design offers a cleaner and more modern aesthetic. There is also no seams or cracks for germs/mold to hide, making it more hygienic and easy to clean.

Color + Texture

A range of vibrant and modern coloration of vessel sinks and pedestals can be ordered to suit any interior design goals. The colors are homogenous, meaning the color is consistent throughout the basin. The blu-stone™ feels like natural stone, making the experience much more enjoyable. Like the bathtub collection, embossing is available in selected models.

Design Flexibility

Besides being easily molded, blu-stone™ integrated vanity tops and countertops can be cut accordingly to fit projects on-site. Similar to wood’s tangibility, it can be sawed, drilled, milled, and ground with hard tipped tools.

Acrylic Bathtub

acrylic bathtub **pisa** BT8004B18
INOX tubfiller TOX540-S, TOX811R/BT-S

features & benefits

Modern sophistication meets effortless functionality with this selection of high gloss European-style **acrylic bathtubs**.

Compact by design, these one-piece acrylic bathtubs offer contemporary designs and require no assembling - making it more manageable and easy to install.

Durable

Constructed with high-quality Lucite acrylic (Plexiglass-like material) ensures durability and ease of repair. With a timeless design for product longevity, blu's acrylic bathtub minimizes waste and energy consumption.

Anti-Rust Steel Frame

Hidden underneath the acrylic tubs are anti-rust steel frames to give the bathtub an extra reinforcement ensuring their longevity and strength.

Adjustable Legs

The addition of four adjustable legs ensures the weight of the water is evenly distributed and the bathtub is installed perfectly leveled with the ground.

Light Weight

Acrylic bathtubs are light weight making them perfect for apartments or weight restricted areas. The lighter weight also makes it easier to move and install.

Interchangeable Slot Overflow + Waste

The integral slot overflow + waste contributes to the minimalist aesthetic, and comes in a standard polished chrome finish. Brushed nickel or white gloss finishes are also available to coordinate with any design motif.

Toilet + Bidet

toilet **metrix** LW6020A, LSeat-slim
bidet **metrix** LB9020
INOX bidet mixer TOX611-S

features & benefits

Blu Bathworks® expanding selection of wall-mount **toilets** embody a clean, minimalist aesthetic while offering cutting edge technology and performance.

All toilet models are compliant with WaterSense and CalGreen, conserving up to 11,000 gallons of water per year.

Stylish

Compact floor and wall-mount designs allow for better use of space. These sleek toilets are timeless and perfect in a variety of spaces. Suitable for ADA universal design requirements and holds up to 800lbs.

Seat Covers

High-performance material with the look and feel of ceramic. This highly break-proof Duroplast cover is extremely durable with a smooth, non-porous surface for maintaining hygienic conditions. Even after years of use, the cover will not lose its shine.

Hygienic

The matrix LW6020A rimless toilet is more hygienic with nowhere for germs to hide, making it easy to clean with simply a cloth. The toilets also feature a more powerful and efficient splash-free flushing system. The specially designed water propulsion system is a major enhancement in low-water flushing performance.

Dual Cyclonic Flush

The coco LW6008 offers dual cyclonic flush action where the water ejects from a small jet hole and flushes along the inner wall of the toilet to create a vortex. The vortex does a thorough 360° clean around the toilet bowl. This revolutionary technology not only cleans the toilet wall, it also enhances the siphon power, achieving a powerful flush every time.
