

where water meets modern®

Blu Bathworks® is a Canadian modern bathware design house and manufacturer based in the heart of beautiful British Columbia. Founded in 2006 by designer Michael Gottschalk, Blu Bathworks' core design philosophy is to create contemporary architectural bathware that balances minimalistic forms with sustainable functionality. Blu Bathworks continues to grow from collaborations with established designers and premium factories in Europe to achieve a high level in both aesthetics and design structure.

Being the complete modern bathware solution, Blu Bathworks offers a wonderful range of rich and unique products that are fully certified in the North American market. Collections include bathtubs, shower bases, basins, countertops, tapware, shower systems, toilets + bidets, and furniture + accessories – all designed to work in harmony or as standalone pieces.

electronica Digital Tapware

Award-winning **electronica** is an innovative digital tapware collection combining Blu Bathworks’ stylish faucet designs with Swiss engineering for the ultimate in home smart system. By replacing mechanical operation with a simple touch-control digital interface, electronica is revolutionizing the way in which we interact with faucets and showers.

Touch-Control

Simply turn on the water by gently pressing the touch-control, and enjoy instant water at your preferred temperature and flow rate. For the bath/shower controls, divert the flow quickly and easily between outlets with just a few touches. Controllers provide instant LED visual feedback indicating water temperature.

Personalization

electronica digital tapware allows users to choose up to three individually saved settings to suit their preferred temperature and flow rate. With DUO-1 (two-way control) for bathtubs, DUO-2 (two-way control) for showers, and DUO-3 (three-way control) for showers.

Remote Control

Control your shower or bath with your smart device from the comfort of your bed – or anywhere else within 33ft / 10m of the digital shower – through a convenient App on your existing Wifi network. Simply insert the WLAN module (TEE005) into your electronica control mixer and enjoy the benefits of modern technology.

Cleaning Mode

Convenient cleaning mode facilitates safe and easy cleaning. Simply hold the control until the light turns to green, which turns off the water supply for 60 seconds to allow the user to clean the surrounding areas without risk of getting wet.

INOX Tapware

INOX Tapware series, characterized by material efficiency and minimal form. Designed as a modular range of bathtub, shower, and basin tapware, its iconic shapes radiate architectural control – featuring slim bodies, sophisticated design language and a luxurious satin finish. Personalize any bathroom design with a selection of wall-mount, deck-mount, and floor-mount applications, and a choice of unique spout designs.

Stainless Steel

INOX collection is crafted from 304 grade stainless steel to ensure product longevity. The material provides resistance to oxidation and corrosion making it also suitable for outdoor use. The series is available in a luxury satin finish.

Design Flexibility

The INOX stainless steel series offers modular design that facilitates coordination across basins, bathtub, and shower applications. With a selection of wall, deck, and floor-mount tapware available to choose from.

Italian-Made

Beautifully crafted in Italy for superior quality, INOX stainless steel thermostatic tapware are distinguished by the craft and care that goes into creating them.
